For starters, we like to say the first word on the page. Note: The sight words are in the alphabetical order. Then, because the sight word is a bubble letter, we like to decorate it with either colored pencils, glue and pom poms and/or kid markers. Once we have finished decorating our sight word, we move on to tracing the sight word. Then, we work on using a dot marker to mark all of the correct sight words that we are working on on the sight word worksheets. Writing it within the boxes comes next and it is so much fun visually seeing that each letter has a different sound as we write it within the boxes. Now the fun part, I've included a simple pop it activity. Use your finger or a marker to mark the sight word within the pop it activity. There is extra space for adding extra letters if you'd like. After that, write out the sight word on the traced line. Each sight word worksheet allows for the child/student to practice and learn the same sight word in a fun way! For any unknown words, we set those aside and work on those at a later time. Similar words or common words are set out side by side to differentiate between the two groups of words. Tip: Add the sight words into the word cards to save a lot of time when bringing the list on the go. Set unknown word cards aside for attempting to learn at a different time. Working on the Fry word list alongside these is common. If you have the Fry sight words list, practice with those if you'd like to as well. Looking for a specific age sight words list?
